THE SIGNAL BY TRADEALGO

Portfolio Data Tiers

How 5 AI Portfolios Power One Newsletter at Five Price Points

The Core Concept

TradeAlgo runs **5 AI-managed portfolios** — Atlas, Everest, Titan, Core, and Midas Link. These portfolios trade real money every day. They exist and run regardless of the newsletter.

The newsletter doesn't sell the portfolios. It sells **visibility** into what those portfolios are doing. Each subscription tier opens a wider window into the same 5 portfolios. The AI doesn't change. The access level does.

Free $0	**Sees: The scoreboard from across the room** Weekly AI market commentary. Daily P&L summary for all 5 portfolios (total return only). One portfolio highlight per issue. Enough to build trust and curiosity.
Premium $149/yr	**Sees: The full trade history — what was bought/sold and when** Everything in Free + complete trade log across all 5 portfolios. Always looking in the rearview mirror — you see what the AI did, but after the fact. Weekly market recap with full data.
Pro $499/yr	**Sees: Every stock the AI is holding RIGHT NOW + real-time alerts** Everything in Premium + current positions held across all 5 portfolios. SMS trade alerts the moment the AI makes a move. You're no longer looking backward — you're watching in real time.
Elite $2,500/yr	**Sees: Exact position sizing — enough to mirror the AI precisely** Everything in Pro + exact dollar allocation per position, options overlay data, weekly video briefing with analyst Q&A. You can replicate every AI decision in your own brokerage.
Managed $50K–$400K	**The AI manages your money directly — no newsletter needed** The ultimate tier. Stop watching the AI, stop copying the AI — hand the AI your capital and it trades for you. Existing Wealth Series products (Atlas Auto, Everest Auto, Midas Link).

Data Access Matrix

DATA POINT	FREE	PREMIUM	PRO	ELITE	MANAGED
Daily P&L (total return)	✓	✓	✓	✓	✓
Trade history (past buys/sells)	—	✓	✓	✓	✓
Current positions held	—	—	✓	✓	✓
Real-time SMS trade alerts	—	—	✓	✓	✓
Exact position sizing	—	—	—	✓	✓
Options overlay data	—	—	—	✓	✓
Weekly video briefing + analyst access	—	—	—	✓	✓
AI manages your capital directly	—	—	—	—	✓

The Key Insight

You are NOT selling 5 different products. You are selling **one product** (visibility into 5 AI portfolios) at 5 different access levels. The AI portfolios are a fixed cost that's already being paid. The newsletter is almost pure margin — you're just deciding how much of that existing data to share at each tier. Every email includes locked content blocks that show lower-tier subscribers exactly what they're missing.

How Each Tier Experiences the Same Email

📊 **Free subscriber opens the email**

Sees: AI market commentary, one portfolio highlight, daily P&L summary. Then a grayed-out section: "Upgrade to Premium to see full trade history →"

📈 **Premium subscriber opens the same email**

Sees everything Free sees + full trade log for all 5 portfolios. Then a grayed-out positions grid: "Upgrade to Pro to see current holdings →"

🔔 **Pro subscriber opens the same email**

Sees everything Premium sees + the current positions grid showing every stock the AI holds right now. Also gets SMS alerts in real time when trades happen.

🎯 **Elite subscriber opens the same email**

Sees everything Pro sees + exact position sizes, options overlay, and gets a weekly video walkthrough with analyst access.

The Upsell Is Built Into the Product

BIG AI WIN	AI closes a 28% gain on CRWD. Email to Premium subs: "Pro members got the SMS alert when we entered at $312. You're seeing this 6 weeks later. Upgrade to Pro →"

EVERY ISSUE	Locked content blocks in every email show exactly what the next tier gets. The product sells itself passively — no separate sales email needed.
QUARTER END	Quarterly performance report. Each tier sees what the next tier gets. Free gets summary. Premium gets full report. Pro gets report + snapshot. Elite gets video walkthrough.
6+ MONTHS PRO	One phone call: "You've been copying the AI's trades by hand. Want us to just do it for you?" → Managed account. The conversation closes itself.
