Logo Variations

Full Logo

The primary logo pairs the TradeAlgo wordmark with our distinctive glyph.

This version is designed for maximum brand recognition and should be used in most branding situations, such as websites, communications, and presentations.

Brandmark

The brandmark is a simplified version of the full logo, intended for spaces where the full logo would be too small or visually dense.

Use the glyph for app icons, favicons, social avatars, and as an accompanying graphic element when a subtler brand touch is better favored.
